## Acknowledgments

The authors would like to thank the Directorate-General of Consular Affairs and Portuguese Communities (DGACCP), from the Cabinet of the Secretary of State of Portuguese Communities Abroad, for all the support provided. We wish to acknowledge the help provided by the national statistical institutes from the following countries: Angola (Instituto Nacional de Estatística, INE), Brazil (Instituto Brasileiro de Geografia e Estatística, IBGE), France (Institut National de la Statistique et des Études Économiques, INSEE), Germany (Statistisches Bundesamt Deutschland, Destatis), Italy (Istituto Nazionale di Statistica, ISTAT), Luxembourg (Institut National de la Statistique et des Études Économiques du Grand-Duché du Luxembourg, STATEC), Mozambique (Instituto Nacional de Estatística, INE), Netherlands (Centraal Bureau voor de Statistiek, CBS), Spain (Instituto Nacional de Estadística, INE), Switzerland (Office Fédéral de la Statistique, OFS) and United Kingdom (Office for National Statistics, ONS).

We appreciate the data from the following institutions: Angolan Consulates in Portugal (Lisbon and Oporto), Federal Office for Migration and Refugees of Germany (Bundesamt für Migration und Flüchtlinge), Federal Office of Migrations of Switzerland (Office Fédéral des Migrations), Department for Work and Pensions of UK and the Brazilian International Migration Observatory (Observatório das Migrações Internacionais, OBMigra).

## Foreword

**01.** Em 2014, a emigração portuguesa manteve-se em alta.<sup>1</sup> Tal como em 2013, mais de 110 mil portugueses deixaram o país. A persistência destes volumes elevados de saídas durante os últimos cinco anos teve como consequência um aumento do número de portugueses emigrados no mundo, o qual, de acordo com dados das Nações Unidas, ultrapassou em 2015 os 2,3 milhões de indivíduos.

**02.** A tendência para a estabilização da emigração num patamar elevado é convergente com a evolução das remessas recebidas em Portugal entre 2013 e 2014. Enquanto nos dois anos anteriores o seu valor subiu de modo significativo, respetivamente, 13% e 10%, em 2014 o crescimento observado em termos nominais foi apenas de 1%. Esta quase estabilização fez-se, porém, com os valores nominais mais elevados de todo o período posterior à adesão ao euro.<sup>2</sup>

**03.** O principal fluxo atual de emigração, para o Reino Unido, que integra quase um terço das saídas anuais de portugueses do país, também desacelerou. Em 2014, tal como em 2013, o número de portugueses que emigrou para o Reino Unido manteve-se nos valores mais elevados de que há registo, superiores a 30 mil indivíduos por ano (com um ligeiro aumento em 2014). Porém, depois de taxas médias de crescimento anual da ordem dos 35% entre 2011 e 2013,<sup>3</sup> também no caso da emigração para o Reino Unido se observa hoje uma tendência para a estabilização num patamar elevado.

**04.** Depois de vários anos sem informação estatística oficial sobre a emigração para França com origem em países da UE, foram finalmente publicados, em 2015, dados sobre as entradas de estrangeiros com cidadania comunitária. De acordo com esses dados, a França continua a ser um dos principais destinos da emigração portuguesa, com valores mais elevados do que os previstos. Em 2012, emigraram para França 18 mil portugueses, mais do dobro do estimado pelo OEm no *Relatório Estatístico de 2014*.<sup>4</sup> Os portugueses constituíram, em 2012, a nacionalidade com mais entradas em França, seguidos de argelinos e marroquinos. A França é, hoje, o segundo país de destino da emigração portuguesa.

<sup>1</sup> Data reported in this issue of the *Portuguese Emigration Factbook* refers to 2014 or last year available. See chapters on “Methodological remarks” and “Metadata”.

<sup>2</sup> See Vidigal and Pires (2014).

<sup>3</sup> See Observatório da Emigração (2014).

<sup>4</sup> See Pires, Pereira, Azevedo, and Ribeiro (2014).

**05.** A estabilização da emigração portuguesa, em termos globais, esconde a existência de variações de sentido contrário que se anulam mutuamente, umas de descida dos fluxos, outras de subida. Assim, pela primeira vez depois do eclodir da crise financeira, o número de portugueses que emigrou para a Suíça diminuiu significativamente (-24%). No entanto, a emigração para este país continua a ter um valor elevado, pelo que a Suíça foi ainda o terceiro país para onde emigraram mais portugueses, depois do Reino Unido e da França. Esta mesma tendência para a diminuição do número de saídas em 2014, embora com intensidades variáveis, caracterizou também os fluxos para a Alemanha, Luxemburgo e Brasil.

**06.** Em sentido inverso, aumentou o número de entradas de portugueses na Bélgica, Moçambique e Espanha. Na Bélgica, o crescimento foi particularmente elevado, na casa dos 35%, o que faz deste país o oitavo destino mais importante da emigração portuguesa. No caso de Espanha, foi a primeira vez, desde o início da crise financeira, que aumentou o número de entradas de portugueses. A Espanha era, no início do século, o principal destino da emigração portuguesa, situação que se alterou profundamente depois da crise financeira em resultado da diminuição do emprego naquele país, sobretudo no sector da construção.<sup>5</sup> A emigração para Espanha não desapareceu mas diminuiu substancialmente, passando de mais de 27 mil, em 2007, para pouco mais de cinco mil, em 2013. Em 2014, este número subiu 12%. A Espanha é, atualmente, o quinto principal país de destino da emigração portuguesa.

**07.** Os efeitos da crise sobre o volume da emigração portuguesa variaram ao longo dos últimos anos. Numa primeira fase, entre 2008 e 2010, a natureza global da crise financeira e, em particular, o impacto no emprego em Espanha acima referido, traduziram-se num decréscimo do número de saídas, em linha com o que aconteceu à época no espaço da OCDE.<sup>6</sup> Desde 2010, com a natureza assimétrica da chamada crise das dívidas soberanas e os efeitos recessivos das políticas de austeridade, a emigração passou a crescer mais do que no período anterior à crise, estabilizando entre 2013 e 2014 na casa das 110 mil saídas por ano, o valor mais elevado desde 1974. É preciso recuar a 1973 para se encontrar valores para a emigração desta ordem de grandeza.

**08.** Aqueles valores elevados de emigração, conjugados com uma diminuição paralela da imigração, traduzem-se em saldos migratórios negativos desde 2011. Em 10 anos, entre 2004 e 2013, Portugal, que apresentava um saldo migratório positivo de quase 50 mil indivíduos, passou a ser um dos países europeus com saldo mais negativo em termos absolutos (-36 mil

---

<sup>5</sup> See Pinho and Pires (2013).

<sup>6</sup> See OECD (2015).

indivíduos), de acordo com os dados do Eurostat sobre migrações nos países da UE e EFTA. Em termos absolutos, só Polónia, Grécia e Espanha apresentavam saldos mais negativos. Descontando os efeitos dos movimentos de retorno, atrás de Portugal apenas apareciam Polónia e Roménia.

**09.** Apesar da emergência e crescimento de novos fenómenos migratórios caracterizados por maior circulação entre origem e destino e a acumulação de percursos de reemigração, os dados indiciam uma tendência para a fixação dos novos emigrantes. Em 2014, a população portuguesa a residir no Reino Unido aumentou significativamente. Foram contabilizados mais 17.000 residentes nascidos em Portugal e mais 28.000 cidadãos com nacionalidade portuguesa. Estas variações do *stock*, que são o resultado das novas entradas subtraídas dos falecimentos, retornos e reemigrações, só podem ser explicadas pelo predomínio das tendências para a fixação dos emigrantes portugueses que se dirigem para o Reino Unido.

**10.** A população nascida em Portugal a residir no estrangeiro (*stock*) aumentou em todos os principais países de destino, à exceção de Espanha. Neste caso, o número de portugueses chegados nos últimos anos foi insuficiente para compensar o número dos que, em consequência da crise, voltaram para Portugal ou reemigraram para outros países (bem como dos que morreram em Espanha).

**11.** Em termos absolutos, é em França que há maior número de portugueses emigrados a adquirirem a nacionalidade do país de destino. Seguem-se Suíça, EUA e Luxemburgo. O número de processos de aquisição de nacionalidade, para além de refletir o número total de emigrantes em cada país e o seu tempo de fixação, depende também das políticas migratórias. Assim se explica, por exemplo, o elevado número de portugueses que adquiriram nacionalidade nos EUA, por comparação com outros países onde residem mais emigrantes portugueses.<sup>7</sup>

**12.** A análise dos dados dos censos de 2001 e 2011 nos países da OCDE, disponibilizados por esta organização internacional (base de dados DIOC), permite caracterizar a população portuguesa emigrada nos diferentes países de destino e identificar as suas principais transformações durante a primeira década do novo século. Permite, ainda, distinguir os diferentes perfis migratórios da antiga e da nova emigração. As observações que se seguem refrem-se a esses dados.

---

<sup>7</sup> See Espírito-Santo and Pires (2014).

**13.** Embora na população portuguesa emigrada predominem os indivíduos em idade ativa, existe uma tendência geral para o envelhecimento que resulta do facto de o recente crescimento da emigração ser ainda insuficiente para compensar a redução verificada entre 1974 e os finais do século XX. O grupo etário dos emigrantes com mais de 64 anos passou de 9% para 16%, entre 2001 e 2011, no conjunto dos países da OCDE, graças sobretudo ao contributo do grande envelhecimento observado nos países de destino do continente americano, para onde diminui muito a intensidade dos fluxos de entrada de novos portugueses. No Canadá, aquela percentagem atingiu os 28% em 2011, valor que contrasta fortemente com o de 7% observado, no mesmo ano, no Reino Unido, o principal país de destino da nova emigração.<sup>8</sup>

**14.** Predominam também, entre os portugueses emigrados, os indivíduos com baixas e muito baixas qualificações, embora se observe um crescimento significativo da proporção dos mais qualificados. A percentagem dos portugueses emigrados com formação superior a residir nos países da OCDE praticamente duplicou, passando de 6% para 11%, entre 2001 e 2011. Nos principais países de destino dos atuais fluxos de emigração a partir de Portugal, a situação é, no entanto, bastante diferente. No Reino Unido, a percentagem dos emigrantes com mais de 15 anos que dispunham de um diploma do ensino superior era, em 2011, de 38%. No polo oposto, aquela percentagem ficava-se pelos 7% entre os emigrantes portugueses a residir em França e os 4% entre os que se fixaram no Luxemburgo.

**15.** A proporção dos emigrantes com mais de 15 anos que dispunham de um diploma do ensino superior, em 2011, é superior entre os que emigraram recentemente, há cinco ou menos anos. Esta percentagem decresce progressivamente entre os que saíram do país há mais anos. De forma inversa, nos que emigraram há dez ou mais anos é superior a percentagem dos emigrantes com ensino básico, diminuindo essa percentagem entre os que saíram do país mais recentemente. As características da emigração para o Reino Unido nos últimos anos ilustram bem esta tendência para uma crescente qualificação da emigração portuguesa recente, sobretudo aquela que se dirige para os novos destinos.<sup>9</sup>

**16.** A estrutura das qualificações reflete-se nas profissões dos portugueses emigrados, entre os quais predominam as profissões manuais, nomeadamente os operários e trabalhadores não qualificados. Tal como acontece com as qualificações, esta estrutura varia bastante nos

<sup>8</sup> O mesmo processo de envelhecimento pode ser observado nas populações portuguesas estabelecidas noutros países que, no passado, constituíram destinos importantes da emigração portuguesa, como o Brasil ou a Venezuela. See Pires, Machado, Peixoto, and Vaz (2011).

<sup>9</sup> See Pereira (2015).

principais países de destino da OCDE. Em 2011, o Luxemburgo era o país com maior percentagem de trabalhadores não qualificados entre os portugueses emigrados (36%), bem como com uma das mais baixas percentagens de dirigentes e quadros (10%). Inversamente, Dinamarca, Suécia e Irlanda eram os países com maior proporção de portugueses em profissões qualificadas (superior a 40%).

**17.** Refira-se, para finalizar, que os dados dos censos permitem identificar com clareza o crescimento da emigração para novos destinos e, simultaneamente, a tendência para a fixação tanto da nova emigração como da mais antiga. Nos novos destinos, Reino Unido, Noruega, Dinamarca e Irlanda, a percentagem de emigrantes portugueses com menos de dez anos de estadia era superior a 50%, em 2011, o que confirma o crescimento recente da emigração para estes países. Pelo contrário, a grande diminuição da emigração para os principais países de destino antes de 1974 (França, EUA e Canadá) tem tradução no facto de a percentagem de portugueses com um tempo de estadia de dez e mais anos superar os 90% nestes países, em 2011. No entanto, mesmo nos países da nova emigração a percentagem de portugueses neles fixados há mais de cinco anos era superior a 40%.

**18.** The *Factbook* consists of four chapters. The first chapter provides aggregated data on total Portuguese emigration, much of which is estimates, as well as comparative data on Portuguese and global emigration. The second chapter contains more detailed information on the four indicators of Portuguese emigration to the main destination countries: flows, stocks, citizenship, and consular records. The third chapter brings together the main information concerning remittances received in Portugal and sent from Portugal. The content of chapter four changes each year. In the first issue, last year, the *Factbook* provided a chronological series on Portuguese emigration to all main destinations during the 21st century.<sup>10</sup> This year's issue contains data from the 2000-01 and 2010-11 censuses concerning the socio-demographic characteristics of immigrant Portuguese populations in the main destination countries of OECD. Finally, the *Factbook* also contains basic information regarding the indicators and sources consulted (methodological remarks, metadata and glossary).

## Highlights

### Total emigration

- For the second consecutive year, total inflow of Portuguese in destination countries exceeded 110 thousand migrants (both in 2013 and 2014).
- In the XX and the XXI centuries, there were higher values of emigration only in five years, from 1969 to 1973, when an average of almost 150 thousand emigrants left Portugal each year.
- Unemployment rate in Portugal was higher than 16% in 2013 and youth unemployment rate reached 38% in that same year.
- According to estimates by the United Nations there were about two million and three hundred thousand Portuguese emigrants worldwide in 2015 (2.306.321), 10% more than five years ago.
- Portuguese emigrants amount to more than 20% of the population living in Portugal.
- In relative terms, Portugal is the European Union country with more emigration (after Malta).
- In ten years, net migration in Portugal dropped from 47 thousand, in 2004, to minus 36 thousand, in 2014, the fourth lowest value in EU after Spain, Greece and Poland.

### Emigration to the main destination countries

- The United Kingdom remained the main destination of Portuguese emigration, with more than 30,000 inflows from Portugal for the second consecutive year.
- In 2014, all the top five countries of destination of Portuguese emigration were European: United Kingdom (30,546 Portuguese inflows), France (18,000), Switzerland (15.221), Germany (10.121), and Spain (5,923).
- Outside Europe, the main destination countries of Portuguese emigration were Angola (ranked 6th in 2014), Mozambique (ranked 8th), and Brazil (ranked 11th), all of them Portuguese speaking countries.
- In 2012 the Portuguese were the nationality most represented among migrant inflows in France.

- In 2014, Portuguese emigration was the second migrant inflow in both Switzerland and Luxembourg, the sixth in the United Kingdom, and the seventh in Brazil.
- Between 2013 and 2014, inflows of Portuguese migrants grew up mainly in Belgium (35%), Spain (12%), and Mozambique (6%).
- Main decreases in the inflows of Portuguese migrants were observed in Brazil (-34%), Switzerland (-24%), Luxembourg (-16%), and Germany (-11%).
- France remains the country with the highest stock of Portuguese-born migrants: 599,333 in 2012.
- There are further seven countries with more than 100 thousand Portuguese-born migrants: Switzerland (211 thousand in 2013), USA (177 thousand in 2014), Canada (140 thousand in 2011), Brazil (138 thousand in 2010), United Kingdom (127 thousand in 2014), Spain (117 thousand in 2014), and Germany (107 thousand in 2014).
- Portuguese-born migrants are the second most numerous immigrant populations in Switzerland (9% of all immigrants) and the third in France (11% of all immigrants).
- About a quarter (23%) of all immigrants living in Brazil in 2010 were Portuguese.
- In 2014 3,345 Portuguese acquired French citizenship.
- In the same year, 2,447 Portuguese acquired the Swiss citizenship, 1,585 the USA citizenship and 1,211 the Luxembourg citizenship.
- Portuguese were about a quarter (24%) of the foreigners that acquired Luxembourg citizenship in 2014.

## Remittances

- In 2014 there was a new record of inward remittances to Portugal exceeding three thousand million euros (€3,057,277,000) and corresponding to around 1.9% of GDP.
- France and Switzerland remain the source of more than half of the remittances received in Portugal (respectively, 29% and 27% of the total).
- Angola was the third country of origin of the remittances received in Portugal (8% of the total).
- Brazil remains the destination for nearly half (48%) of remittances sent abroad by immigrants living in Portugal.
- Between 2013 and 2014, remittances received in Portugal rose by 1.4% in nominal terms but decreased as a percentage of GDP (-1.8%).
- Major remittance flows received in Portugal with largest increases between 2013 and 2014, in nominal terms, were those from the United Kingdom (29%) and Switzerland (10%).

- Major remittance flows received in Portugal with largest decreases between 2013 and 2014, in nominal terms, were those from Angola (-19%) and France (-1%).
- Between 2012 and 2013, Portugal dropped from 29th to 24th among the top recipient countries of migrant remittances.

### **The census data on Portuguese-born emigrants living in OECD countries**

- According to census data, the five countries with largest increases in the stock of Portuguese-born migrants between 2000/01 and 2010/11 were Switzerland (more 68 thousand Portuguese migrants), United Kingdom (55 thousand), Spain (43 thousand), France (36 thousand) and Luxembourg (19 thousand).
- In relative terms, the largest increases in the major stocks of Portuguese-born migrants between 2000/01 and 2010/11 were observed in United Kingdom (152%), Spain (76%), Switzerland (68%), Luxembourg (46%), and France (6%).
- Between 2000/01 and 2010/11, the share of Portuguese-born migrants aged 65 or older increased by 55%, from 11% to 17%.
- In 2010/11 the share of Portuguese-born migrants aged 65 or older was higher in Canada (28%), Australia (23%) and USA (23%), and lower in Luxembourg (5%), United Kingdom (7%) and Spain (12%).
- Between 2000/01 and 2010/11, the share of Portuguese-born migrants with the nationality of the country of residence increased by 14%, from 35% to 40%.
- In 2010/11 the share of Portuguese-born migrants with the nationality of the country of residence was higher in Canada (83%), Australia (81%) and USA (68%), and lower in Ireland (3%), Luxembourg (6%), and United Kingdom (9%).
- Between 2000/01 and 2010/11, the share of Portuguese-born migrants living in the country of residence for more than ten years decreased by -4%, from 84% to 81%.
- In 2010/11 the share of Portuguese-born migrants living in the country of residence for more than ten years was higher in Canada (97%), USA (95%), Australia (94%) and France (89%), and lower in Ireland (18%), Denmark (31%), Norway (39%) and United Kingdom (41%).
- Between 2000/01 and 2010/11, the share of Portuguese-born migrants with high educational attainment [ISCED 5A/5B/6] increased by 70%, from 7% to 11%.
- In 2010/11 the share of Portuguese-born migrants with high educational attainment [ISCED 5A/5B/6] was higher in Norway (40%), United Kingdom (38%) and Ireland (37%), and lower in Luxembourg (4%), Switzerland (6%), and France (7%).

- In 2010/11 the share of Portuguese-born migrants with high educational attainment [ISCED 5A/5B/6] was 23% for those living in the country of residence for less than five years and 9% for those living in the country of residence for more than ten years.
- In 2010/11 the share of unemployed Portuguese-born migrants aged 15 and over was 6% in OECD countries, in average, but it reached 18% in Ireland and 23% in Spain.
- In 2010/11 only 19% of the employed Portuguese-born emigrants had high or very high skilled occupations (managers, professionals and technicians), ranging from 10% in Luxembourg to 45% in Denmark.

## Methodological remarks

**01.** There is a basic asymmetry in international migration. The right to leave the country in which you live is today established as a basic human freedom. However, entry into a country of which you are not a national continues to depend on the sovereign will of the nation states. Consequently, there is no record of exits (emigration), only of entries (immigration). Estimating and characterising emigration from a country therefore requires gathering data on the entry and permanence of emigrants in their country of destination. The data the Observatório da Emigração gathers, reports and analyses is obtained from the institutes responsible for collecting immigration statistics in each of the countries the Portuguese emigrate to.

**02.** The challenge of harmonising the data produced by such a large number of organisations, the weaknesses of the statistical systems in some countries, and the international nature of the movements studied are at the origin of an increasing intervention by leading international organisations responsible for the production of databases and statistical indicators on emigration. Consulting this data is now crucial if we are to achieve a better understanding of the phenomenon of migration. The Factbook also brings together data and estimates about Portuguese emigration available from sources such as Eurostat, the OECD, the World Bank and the United Nations.

**03.** There is currently a consensus among international organisations on the use of place of birth as a migration indicator: an emigrant is someone who has lived for more than a year in a country different from the one in which he was born.<sup>11</sup> However, in terms of the statistics concerning the entry of immigrants into a country, the data generally refers to the entry of foreigners, given that controlling the entry of foreigners is the purpose of the register. As a rule, the Factbook uses both emigration indicators. When measuring and characterising the emigrant Portuguese population, the indicator used whenever possible is country of birth – people born in Portugal and living in other countries. When measuring the entry of Portuguese into their destination country, the indicator generally used is that of nationality – Portuguese citizens entering other countries.

---

<sup>11</sup> See Lemaitre (2005) and United Nations, Department of Economic and Social Affairs (1998).

**04.** The dispersion of data about Portuguese emigration, which is produced by statistics agencies in dozens of countries, each in their own national languages, and which are often unavailable to the public, makes it very difficult to obtain quick individual access to relevant information. The Observatório's main goal is to remove the difficulties and to compile and select original data on Portuguese emigration that is available from the sources in the destination countries, and, whenever necessary, to negotiate the collection of and access to the data produced by these sources that remains unavailable. The Observatório then harmonises and gathers together the data and makes it available through its website and in its publications. The Factbook is intended to be an annual compilation of the main indicators of Portuguese emigration resulting from this systematic endeavour, making it available in a condensed format to all those requiring this information: in particular to researchers, decision-makers and journalists.

## Glossary

**Acknowledgment** Adapted from European Migration Network (2014), *Asylum and Migration Glossary 3.0. A Tool for Better Comparability*, Directorate General for Home Affairs, European Commission. The EMN Glossary has been developed by the European Migration Network (EMN). The European Commission and the National Contact Points, which collectively constitute the EMN, accept no responsibility or liability whatsoever with regard to the use made of the information contained in this Glossary or of the content of the websites from which some terms are extracted. [\[LINK\]](#)

### Acquisition of citizenship

Any mode of becoming a national, i.e., by birth or at any time after birth, automatic or non-automatic, based on attribution, declaration, option or application.

**Notes** [1] Art. 3 (d) of Regulation (EC) No. 862/2007 (Migration Statistics Regulation) refers or relates to the acquisition of citizenship to those persons having their usual residence in the territory of the Member State and having acquired during the reference year the citizenship of the Member State and having formerly held the citizenship of another Member State or a third country or having formerly been a stateless person. [2] One of the possible ways of acquiring citizenship is through naturalisation, which refers more to the decision / administrative process by the relevant authorities for the granting of nationality.

### Citizenship

The particular legal bond between an individual and their state, acquired by birth or naturalisation, whether by declaration, choice, marriage or other means according to national legislation.

**Notes** [1] Whilst in some Member States a distinction is made between citizenship and nationality, in the EU context and for the purpose of this glossary, no distinction is made and the two terms are considered to be interchangeable. In countries which distinguish between citizenship and nationality, the term citizenship refers specifically to the legal rights and duties of nationals. The European Convention on Nationality, the International Organisation for Migration (IOM) Glossary and the EUDO Glossary on Citizenship and Nationality prefer the term “nationality”. [2] According to Art. 1 of the Hague Convention on Certain Questions Relating to the Conflict of Nationality Law, 1930, it is for each State to determine under its own laws who are its nationals. [3] The tie of nationality confers individual rights and imposes obligations that a State reserves for its population. Nationality carries with it certain consequences as regards migration, such as the right of a State to protect its nationals against violations of their individual rights committed by foreign authorities (particularly by means of diplomatic protection), the duty to accept its nationals onto its territory, and the prohibition to expel them.

### Consular registration

National citizens of a given country residing abroad and registered voluntarily at a consular office of the origin country. The registration is a consular act, whereby the identification of the national citizen is inscribed in the archives of the consular office of the area of jurisdiction in which the citizen is resident or lives occasionally.

### **Emigrant**

In the global context, a resident (national or alien) departing or exiting from one State intending to remain abroad for a period exceeding one year. In the EU context, a person who, having previously been usually resident in the territory of a Member State, ceases to have their usual residence in that Member State for a period that is, or is expected to be, of at least 12 months.

**Note** National legislation might understand different time limits in their definitions.

### **Emigration**

In the global context, the act of departing or exiting from one State with the intention to remain abroad for a period exceeding one year. In the EU context, the action by which a person, having previously been usually resident in the territory of a Member State, ceases to have their usual residence in that Member State or another Member State for a period that is, or is expected to be, of at least 12 months.

### **Foreign population of a country**

All persons who have a certain country as their country of usual residence and who are citizens of another country.

### **Immigrant**

In the global context, a non-resident (either national or alien) arriving in a State with the intention to remain for a period exceeding a year. In the EU context, a person who establishes their usual residence in the territory of a Member State for a period that is, or is expected to be, of at least 12 months, having previously been usually resident in another Member State or a third country.

### **Immigration**

In the global context, the act of arriving in a State with the intention to remain for a period exceeding one year. In the EU context, the action by which a person establishes their usual residence in the territory of a Member State for a period that is, or is expected to be, of at least 12 months, having previously been usually resident in another Member State or a third country.

### **Irregular migration**

Movement of persons to a new place of residence or transit that takes place outside the regulatory norms of the sending, transit and receiving countries.

**Notes** [1] There is no universally accepted definition of irregular migration. From the perspective of destination countries it is entry, stay or work in a country without the necessary authorisation or documents required under immigration regulations. From the perspective of the sending country, the irregularity is, for example, seen in cases in which a person crosses an international boundary without a valid passport or travel document or does not fulfil the administrative requirements for leaving the country. There is, however, a tendency to restrict the use of the term to cases of smuggling of migrants and

trafficking in persons. [2] Defining irregular migration has been the subject of considerable debate. Terms such as illegal, undocumented, non-documented, and unauthorised migration can have different connotations in national policy debates. Due to this and the association with criminality the term “illegal migration” should be avoided, as most irregular migrants are not criminals. Being in a country without the required papers is, in most countries, not a criminal offence but an administrative infringement. [3] While the UN use the term “irregular” or “undocumented” migration, the European Commission favoured for a long time the term “illegal immigration”, but more recently refers to “irregular migration” as well. [4] The Council of Europe differentiates between illegal migration and irregular migrant. Referring to Resolution 1509 (2006) of the Council of Europe Parliamentary Assembly, “illegal” is preferred when referring to a status or process, whereas “irregular” is preferred when referring to a person.

### **Long-term migrant**

A person who moves to a country other than that of their usual residence for a period of at least a year (12 months), so that the country of destination effectively becomes their new country of usual residence.

### **Migrant stock**

The number of migrants in a given area on a certain date (e.g. 1 January or 31 December) of the year in question.

### **Migration**

In the global context, movement of a person either across an international border (international migration), or within a state (internal migration) for more than one year irrespective of the causes, voluntary or involuntary, and the means, regular or irregular, used to migrate. In the EU context, the action by which a person either: (i) establishes their usual residence in the territory of a Member State for a period that is, or is expected to be, of at least 12 months, having previously been usually resident in another Member State or a third country; or (ii) having previously been usually resident in the territory of a Member State, ceases to have their usual residence in that Member State for a period that is, or is expected to be, of at least 12 months.

**Notes** [1] At the international level, no universally accepted definition for migration exists. [2] IOM defines migration as follows: “movement of a person or a group of persons, either across an international border (international migration), or within a state (internal migration), encompassing any kind of movement of people, whatever its length, composition and causes”. This broad definition covers all forms of migration (voluntary/forced migration, internal/international migration, long-term/short-term migration), different motives for migration (migration because of political persecution, conflicts, economic problems, environmental degradation or a combination of these reasons or migration in search of better economic conditions or conditions of survival or well-being, or other motives such as family reunification) and irrespective of the means used to migrate (legal/irregular migration). Thus it includes migration of refugees, displaced persons, economic migrants and persons moving for other purposes, including family reunification. [3] Under the UN, the definition “movements for shorter periods” would not be considered migration.

### **Migration flow**

The number of migrants crossing a boundary, within a specific time period, for the purpose of establishing residence.

**Notes** [1] The boundary can range from within national borders, within the EU and international boundaries, and can range from international migration flows (crossing national borders) and internal migration flows (within the same national border). [2] UN statistics in particular also refer to “inflows” (flow of migrants entering into a particular boundary) and “outflows” (flow of migrants leaving a particular boundary).

## Net migration

The difference between immigration into and emigration from a given area during the year.

**Notes** [1] Net migration is negative when the number of emigrants exceeds the number of immigrants. [2] Since many countries either do not have accurate figures on immigration and emigration or have no figures at all, net migration is frequently estimated as the difference between total population change and natural increase between two dates (in Eurostat’s database it is then called corrected net migration). The statistics on net migration are therefore affected by any statistical inaccuracies in any of the components used for their derivation.

## Population stock

The inhabitants of a given area on a certain date (e.g. 31 December) of the year in question.

**Note** The population is based either on data from the most recent census, adjusted by the components of population change produced since the last census, or on population registers.

## Remittances

Personal remittances. Includes personal transfers and compensation of employees. Personal transfers consist of all current transfers made or received by resident households to or from nonresident households. Compensation of employees refers to the income of border, seasonal, and other short-term workers who are employed in an economy where they are not resident and of residents employed by nonresident entities.

## Short-term migrant

A person who moves to a country other than that of their usual residence for a period of at least three months but less than a year (12 months) except in cases where the movement to that country is for purposes of recreation, holiday, visits to friends or relatives, business, medical treatment or religious pilgrimage.

## Stock of foreigners

The number of foreign nationals in a given area on a certain date (e.g. 1 January or 31 December) of the year in question.

**Notes** [1] The term is added because of the two methods used to calculate population stock. [2] Foreign stock can include migrants plus those born in a given area to foreign parents living in given area.

## Temporary migration

Migration for a specific motivation and/or purpose with the intention that afterwards there will be a return to the country of origin or onward movement.

## Metadata

## Consular registrations

**All countries** Voluntary registration of Portuguese and relatives in Portuguese consulates. Source 2012-2013 Ministério dos Negócios Estrangeiros, Direção-Geral dos Assuntos Consulares e das Comunidades Portuguesas (DGACCP), Portugal: information provided on request. Data available in each country page at Observatório da Emigração. [\[LINK\]](#)

## Foreign population

**Belgium** Foreign population in the population annual register. Source 2013-2014: Eurostat, based in the Belgium Direction Générale Statistique et Information Économique. [\[LINK\]](#)

**Canada** Foreign population in the 2011 Canadian census. The data refers only to people with one nationality. People with two or more are excluded. In 2011 there were over 18,315 individuals born in Portugal who had a second nationality in addition to the Portuguese one. Source 2011: Statistics of Canada, National Household Survey 2011: citizenship (5), place of birth (236), immigrant status and period of immigration (11), age groups (10) and sex (3) for the population in private households of Canada, provinces, territories, census metropolitan areas and census, agglomerations. [\[LINK\]](#)

**France** Foreign population in the annual census. The data for census surveys is collected by the municipalities and monitored and organised by the national statistical office. Source 2011: Institut National de la Statistique et des Études Économiques (INSEE): Répartition des étrangers par nationalité en 2011. [\[LINK\]](#)

**Germany** Foreign population registered in the Central Register of Foreigners (Ausländerzentralregister). The number concerns individuals of foreign citizenship living in the country for at least three months and includes both those born outside Germany and those born in Germany. Source 2013: Statistisches Bundesamt Deutschland, Ausländische Bevölkerung, Fachserie 1 Reihe 2, 2013, tabelle 7, Ausländische Bevölkerung. [\[LINK\]](#)

**Italy** Foreign population in the municipal registry offices. Source 2013: Istituto Nazionale di Statistica: resident foreigners. [\[LINK\]](#)

**Luxembourg** Foreign population registered each year. Does not include visitors (less than three months) and cross-border workers. Source 2014: Le Portail des Statistiques du Luxembourg: population par sexe et par nationalité. [\[LINK\]](#)

**Mozambique** Foreign population in the Mozambique census. The data refers only to people with one nationality. People with two or more nationalities are excluded. Source 2007: Instituto Nacional de Estatística: information provided on request. [\[LINK\]](#)

**Netherlands** Foreign population in the population register. Data concerns 1st January of 2014. Source 2014: Centraal Bureau voor de Statistiek: population; sex, age and nationality, 1st January. [\[LINK\]](#)

**Norway** Foreign population in the population register. Excludes visitors (less than six months) and cross-border workers. Source 2014: Statistics Norway: population, by sex, age and citizenship. [\[LINK\]](#)

**Spain** Foreign population in the population register. Data includes all registered foreign citizens no matters their administrative status. Source 2014: Instituto Nacional de Estadística, Padron Municipal de habitantes: datos nacionales por CCAA y por provincias, población por nacionalidad, país de nacimiento y sexo. [\[LINK\]](#)

**Switzerland** Residence permits, including also people who stay in the country more than 12 months. Does not include seasonal or cross-border workers. Source 2014: Office Fédéral de la Statistique: population résidente permanente et non permanente selon le canton, le sexe, l'autorisation de résidence, la classe d'âge et la nationalité. [\[LINK\]](#)

**United Kingdom** Estimates of the foreign population based on the Annual Population Survey (APS) which is the Labour Force Survey (LFS) plus various sample boosts. Source 2014: Office for National Statistics, Annual Population Survey (APS) /Labour Force Survey (LFS): population by country of birth and nationality (2.4. Estimated population of overseas nationals resident in the United Kingdom by sex, by nationality). [\[LINK\]](#)

**United States** Estimates of the foreign population based on the annual American Community Survey. Source 2012: US Census Bureau, American Community Survey, Fact Finder, advanced search, race and ethnic groups, detailed groups [enter Portuguese], selected population profile in the United States, one year estimate. [\[LINK\]](#)

## Permanent inflows

**Belgium** Foreigners holding a residence permit and intending to stay in the country for at least 3 months. Source 2011-2012: OECD, International Migration Database, based in the Belgium Direction Générale Statistique et Information Économique. [\[LINK\]](#)

**Brazil** Foreigners holding permanent work permits, indexed to periods for at least 1 year, or temporary work permits, indexed to the periods of work contracts (which may be more than 1 year or less than 1 year). Source 2013-2014: Ministério do Trabalho e Emprego, Coordenação Geral de Imigração (CGI): autorizações concedidas a estrangeiros por país de origem. [\[LINK\]](#)

**Canada** Foreigners holding a permanent resident status. Source 2013-2014: Citizenship and Immigration Canada. permanent residents by source country. [\[LINK\]](#)

**France** Specific survey, in which estimate is based on the result of annual census survey sample of France. Since 2004 the new method is based in the following sample of lodgings: for the small departments (less than 10.000 habitants) one in five is registered, for the big departments a sample of 8% is registered every year. Source 2012: Institut National de la Statistique et des Études Économiques: les immigrés récemment arrivés en France. [\[LINK\]](#)

**Germany** All foreigners registered, each year, at the Central Register of Foreigners (Ausländerzentralregister) if they stay in Germany more than ninety days. Foreigners from outside EU hold a resident permit. The total foreign inflows include the number of foreigners born in Germany in the year in question. Source 2013-2014: Statistisches Bundesamt Deutschland: Ausländische Bevölkerung, Ausländische Bevölkerung Fachserie 1 Reihe 2, 2014, tabelle 14. [\[LINK\]](#)

**Italy** Foreigners holding a residence permit (short-term and long-term). Long-term resident permits for EU citizens (more than 3 months) grant annual or biennial residence, according to the reason for their presence in Italy, renewable at the end of the expiration date. Source 2012-2013: OECD, International Migration Database, based in Italian Ministro dell'Interno. [\[LINK\]](#)

**Luxemburg** Foreigners who arrived in the country, holding a resident permit and intending to stay for at least 3 months. Source 2013-2014: Le Portail des statistiques du Luxembourg: arrivées, 1967-2014. [\[LINK\]](#)

**Netherlands** For EU citizens arriving in the Netherlands from another country with the intention of staying in the country for at least four months during the first six months following, registration is obligatory at the municipality where they are staying. Foreigners from outside EU hold a resident permit that is valid for one year and can be renewed. All inflows are registered by country of birth. Source 2012-2013: Centraal Bureau voor de Statistiek: statline database (population > migration and migrants), external migration; sex, age (31 dec), marital status and country of birth. [\[LINK\]](#)

**Norway** Foreigners holding a resident or work permit and intending to stay in the country for at least 6 months. Source 2013-2014: Statistics Norway: immigration, emigration and net migration, by citizenship. [\[LINK\]](#)

**Spain** Foreigners registered in the national Municipal Registers, Padron Municipal de Habitantes, and intending to stay in the country for at least 1 year. Source 2013-2014: INE España: estadística de variaciones residenciales, altas por país de nacionalidad sexo y edad. [\[LINK\]](#)

**Switzerland** Foreigners holding a permanent or an annual resident permit. Holders of an L-Permit (short duration) are also included if their stay in the country is longer than 12 months. Inflow includes also status change by citizenship. In 2014 the Office Fédéral de la Statistique altered the collection and recording method of accounting inflows in Switzerland. Source 2013-2014: Office Fédéral de la Statistique: immigration de la population résidante permanente selon la nationalité, 1991-2014. [\[LINK\]](#)

**United Kingdom** Foreigner 16 and older who entered the country and were conceded a National Insurance Number (NIN) by the Department for Work and Pensions (social security system) because they are looking for work or already obtained employment. 2013-2014: Department for Work and Pensions: stat-explore. [\[LINK\]](#)

**United States** Inflows correspond to permanent resident permit concessions (including status changes), by country of birth, in the fiscal year ending 30 September of each (calendar) year indicated and starting on 1st October of the previous year. Source 2012-2013: US Department of Homeland Security: Yearbook of Immigration Statistics 2013 (table 3, persons obtaining lawful permanent resident status by region and country of birth: fiscal years 2004 to 2013). [\[LINK\]](#)

## Remittances

**All countries** Personal remittances. Includes personal transfers and compensation of employees. Personal transfers consist of all current transfers made or received by resident households to or from nonresident households. Compensation of employees refers to the income of border, seasonal, and other short-term workers who are employed in an economy where they are not resident and of residents employed by nonresident entities. Source 2012-2013: World Bank, World DataBank, World Development Indicators. [\[LINK\]](#)

**Portugal** Personal remittances. Includes personal transfers and compensation of employees. Personal transfers consist of all current transfers made or received by resident households to or from nonresident households. Compensation of employees refers to the income of border, seasonal, and other short-term workers who are employed in an economy where they are not resident and of residents employed by nonresident entities.
