The Emigration Observatory (OEm) is an independent technical and research structure within the Centre for Research and Studies in Sociology (CIES-IUL) of ISCTE – University Institute of Lisbon. The Observatory is based on a partnership between the CIES-IUL, the Institute of Sociology (IS-UP) of the University of Porto, and the Centre for Geographical Studies (CEG) and the Centre for Research in Economic and Organizational Sociology (SOCIUS/CSG), both of the University of Lisbon. The Observatory is supported by the Portuguese Ministry of Foreign Affairs under a cooperation agreement.

Acknowledgments

The authors would like to thank the Directorate-General of Consular Affairs and Portuguese Communities (DGACCP), from the Cabinet of the Secretary of State of Portuguese Communities Abroad, for all the support provided. We wish to acknowledge the help provided by the national statistical institutes from the following countries: France (Institut National de la Statistique et des Études Économiques, INSEE), Germany (Statistisches Bundesamt Deutschland, Destatis), Italy (Istituto Nazionale di Statistica, ISTAT), Luxemburg (Institut National de la Statistique et des Études Économiques du Grand-Duché du Luxembourg, STATEC), Mozambique (Instituto Nacional de Estatística, INE), Netherlands (Centraal Bureau voor de Statistiek, CBS), Spain (Instituto Nacional de Estadística, INE), Switzerland (Office Fédéral de la Statistique, OFS) and United Kingdom (Office for National Statistics, ONS).

We appreciate the data from the following institutions: Angolan Consulates in Portugal (Lisbon and Oporto), Federal Office for Migration and Refugees of Germany (Bundesamt für Migration und Flüchtlinge), Federal Office of Migrations of Switzerland (Office Fédéral des Migrations), and the Department for Work and Pensions of UK.

Foreword and highlights

General trends

01. In 2016, the decrease in Portuguese emigration was accelerated, with about 100 thousand individuals leaving the country. The review of the statistical series estimated by the Observatory on total emigration points to the existence of a peak of emigration in 2013, higher than the one estimated so far, of around 120,000 outflows, as well as a progressive slower descent, in 2014 and 2015, to values around 110 thousand exits.

02. Globally, the reduction of emigration from 2014 can be explained by the economic recovery in Portugal. However, the acceleration of this decline in 2016 is due to changes in two important destination countries: Angola and the United Kingdom. In 2016, with the accentuation of the oil crisis in Angola and with the approval of Brexit in the United Kingdom, emigration to these two countries had its first drop since 2011.

03. Portugal has a negative net migration since 2011. This is because the small number of immigrants entering the country is not enough to compensate the number of emigrants leaving. According to Eurostat data, in Europe only Greece and Eastern European countries also had a negative net migration in 2015.

03. As stated in previous editions of the *Factbook*, Portugal is the European Union country with more emigrants in proportion to the resident population (considering only countries with more than one million inhabitants). According to the latest estimates by the United Nations, in 2015, the number of emigrants born in Portugal has surpassed two million and three hundred thousand, which means that about 22% of Portuguese live outside the country. The majority live in Europe, 62% in 2015, according to United Nations estimates. Concerning educational attainment, the latest available data, the Census 2011, indicates that among the total number of Portuguese living in OECD countries, only 11% attained high education, about a quarter, 27%, the medium education, and the majority, 62%, the low education.

Portuguese permanent inflows in main destination countries

04. Between 2015 and 2016 the number of Portuguese inflows in the United Kingdom decreased by 5%. In both absolute and relative terms, the decrease was even greater in emigration to Angola (-42%, -2,807 admissions) and Mozambique. For the third consecutive year, the trend towards a decrease in emigration to Germany and Switzerland has continued. Data on Portuguese arrivals in France show a stabilization of the flow in high values: on average, between 10 and 18 thousand entries per year between 2010 and 2016, depending on the indicator. In contrast to these more general trends, emigration to Spain grew by 15% in 2016, after having increased by 12% in the previous two years.

05. Despite the decrease observed between 2015 and 2016, the United Kingdom remains the main country of destination to Portuguese emigration: 30,500 outflows in 2016. The main destinations for the Portuguese outflows were France (more than 18,000 in 2014), Switzerland (10,100 in 2016) and Germany (8,800 in 2016). Outside of Europe, the main destination countries for Portuguese emigration are in Africa: Angola (3,900 in 2016) and Mozambique (1,400 in 2016). From the point of view of the destination countries, the impact of Portuguese emigration was more intense in Luxembourg, where these entries were the second largest flow of new immigrants, in Switzerland (fourth largest flow) and in the United Kingdom (seventh largest flow).

Migrants born in Portugal living in the main countries of destination (stock)

06. France continues to be the country in the world where a greater number of migrants born in Portugal live: more than 600 thousand in 2013, the last year for which official information is available. There are also more than 100,000 resident Portuguese emigrants in Switzerland (223 thousand in 2016), the USA (148 thousand in 2014), Canada (143 thousand in 2011), Brazil (138 thousand in 2010), the United Kingdom (131,000 in 2016), Germany (112,000 in 2016) and Spain (100,000 in 2016). In Spain, the resumption of emigration continues to be insufficient to compensate for the annual number of exits for return or re-emigration that followed the crisis of 2008: between 2015 and 2016 there was a relative reduction in the number of Portuguese living there of 6.7%, after a decrease of 8% between 2014 and 2015.

Remittances received

07. In 2016, the value of remittances received in Portugal was slightly over 3.3 billion euros (€ 3,343,200). Between 2015 and 2016 the value of remittances received almost stagnated. However, due to the economic growth in Portugal during the same period, the value of remittances as a percentage of GDP declined slightly, from 1.8 to 1.7%. The two countries with the most Portuguese migrants, France and Switzerland, were also the countries of origin of more than half of the remittances received in Portugal in 2016 (34% and 21%, respectively). However, the evolution of remittances originating in these two countries between 2015 and 2016 had opposite signs: while the remittances from France were the ones that in absolute terms grew the most, those from Switzerland were the ones that had the greatest decrease, both in absolute and relative terms. Finally, it should be noted that among developed countries Portugal continues to be the one with the largest share of remittances in GDP.

Methodological remarks

01. There is a basic asymmetry in international migration. The right to leave the country in which you live is nowadays established as a basic human freedom. However, entry into a country of which you are not a national continues to depend on the sovereign will of the nation states. Consequently, there is no record of exits (emigration), only of entries (immigration). Estimating and characterising emigration from a country therefore requires gathering data on the entry and permanence of emigrants in their country of destination. The data the Observatório da Emigração gathers, reports and analyses is obtained from the institutes responsible for collecting immigration statistics in each of the countries the Portuguese emigrate to.

02. The challenge of harmonising the data produced by such a large number of organisations, the weaknesses of the statistical systems in some countries, and the international nature of the movements studied are at the origin of an increasing intervention by leading international organisations responsible for the production of databases and statistical indicators on emigration. Consulting this data is now crucial if we are to achieve a better understanding of the phenomenon of migration. The Factbook also brings together data and estimates about Portuguese emigration available from sources such as Eurostat, the OECD, the World Bank and the United Nations.

03. There is currently a consensus among international organisations on the use of place of birth as a migration indicator: an emigrant is someone who has lived for more than a year in a country different from the one in which he was born.¹ However, in terms of the statistics concerning the entry of immigrants into a country, the data generally refers to the entry of foreigners, given that controlling the entry of foreigners is the purpose of the register. As a rule, the Factbook uses both emigration indicators. When measuring and characterising the emigrant Portuguese population, the indicator used whenever possible is country of birth – people born in Portugal and living in other countries. When measuring the entry of Portuguese into their destination country, the indicator generally used is that of nationality – Portuguese citizens entering other countries.

¹ See Lemaitre (2005) and United Nations, Department of Economic and Social Affairs (1998).

04. The dispersion of data about Portuguese emigration, which is produced by statistics agencies in dozens of countries, each in their own national languages, and which are often unavailable to the public, makes it very difficult to obtain quick individual access to relevant information. The Observatório's main goal is to remove the difficulties and to compile and select original data on Portuguese emigration that is available from the sources in the destination countries, and, whenever necessary, to negotiate the collection of and access to the data produced by these sources that remains unavailable. The Observatório then harmonises and gathers the data, making it, afterwards, available through its website and in its publications. The Factbook is intended to be an annual compilation of the main indicators of Portuguese emigration resulting from this systematic endeavour, making it available in a condensed format to all those requiring this information: in particular to researchers, decision-makers and journalists.

Glossary

Acknowledgment Adapted from European Migration Network (2014), *Asylum and Migration Glossary 3.0. A Tool for Better Comparability*, Directorate General for Home Affairs, European Commission. The EMN Glossary has been developed by the European Migration Network (EMN). The European Commission and the National Contact Points, which collectively constitute the EMN, accept no responsibility or liability whatsoever with regard to the use made of the information contained in this Glossary or of the content of the websites from which some terms are extracted. [\[LINK\]](#)

Acquisition of citizenship

Any mode of becoming a national, i.e., by birth or at any time after birth, automatic or non-automatic, based on attribution, declaration, option or application.

Notes [1] Art. 3 (d) of Regulation (EC) No. 862/2007 (Migration Statistics Regulation) refers or relates to the acquisition of citizenship to those persons having their usual residence in the territory of the Member State and having acquired during the reference year the citizenship of the Member State and having formerly held the citizenship of another Member State or a third country or having formerly been a stateless person. [2] One of the possible ways of acquiring citizenship is through naturalisation, which refers more to the decision / administrative process by the relevant authorities for the granting of nationality.

Citizenship

The particular legal bond between an individual and their state, acquired by birth or naturalisation, whether by declaration, choice, marriage or other means according to national legislation.

Notes [1] Whilst in some Member States a distinction is made between citizenship and nationality, in the EU context and for the purpose of this glossary, no distinction is made and the two terms are considered to be interchangeable. In countries which distinguish between citizenship and nationality, the term citizenship refers specifically to the legal rights and duties of nationals. The European Convention on Nationality, the International Organisation for Migration (IOM) Glossary and the EUDO Glossary on Citizenship and Nationality prefer the term “nationality”. [2] According to Art. 1 of the Hague Convention on Certain Questions Relating to the Conflict of Nationality Law, 1930, it is for each State to determine under its own laws who are its nationals. [3] The tie of nationality confers individual rights and imposes obligations that a State reserves for its population. Nationality carries with it certain consequences as regards migration, such as the right of a State to protect its nationals against violations of their individual rights committed by foreign authorities (particularly by means of diplomatic protection), the duty to accept its nationals onto its territory, and the prohibition to expel them.

Consular registration

National citizens of a given country residing abroad and registered voluntarily at a consular office of the origin country. The registration is a consular act, whereby the identification of the national citizen is inscribed in the archives of the consular office of the area of jurisdiction in which the citizen is resident or lives occasionally.

Emigrant

In the global context, a resident (national or alien) departing or exiting from one State intending to remain abroad for a period exceeding one year. In the EU context, a person who, having previously been usually resident in the territory of a Member State, ceases to have their usual residence in that Member State for a period that is, or is expected to be, of at least 12 months.

Note National legislation might understand different time limits in their definitions.

Emigration

In the global context, the act of departing or exiting from one State with the intention to remain abroad for a period exceeding one year. In the EU context, the action by which a person, having previously been usually resident in the territory of a Member State, ceases to have their usual residence in that Member State or another Member State for a period that is, or is expected to be, of at least 12 months.

Foreign population of a country

All persons who have a certain country as their country of usual residence and who are citizens of another country.

Immigrant

In the global context, a non-resident (either national or alien) arriving in a State with the intention to remain for a period exceeding a year. In the EU context, a person who establishes their usual residence in the territory of a Member State for a period that is, or is expected to be, of at least 12 months, having previously been usually resident in another Member State or a third country.

Immigration

In the global context, the act of arriving in a State with the intention to remain for a period exceeding one year. In the EU context, the action by which a person establishes their usual residence in the territory of a Member State for a period that is, or is expected to be, of at least 12 months, having previously been usually resident in another Member State or a third country.

Irregular migration

Movement of persons to a new place of residence or transit that takes place outside the regulatory norms of the sending, transit and receiving countries.

Notes [1] There is no universally accepted definition of irregular migration. From the perspective of destination countries it is entry, stay or work in a country without the necessary authorisation or documents required under immigration regulations. From the perspective of the sending country, the irregularity is, for example, seen in cases in which a person crosses an international boundary without a valid passport or travel document or does not fulfil the administrative requirements for leaving the country. There is, however, a tendency to restrict the use of the term to cases of smuggling of migrants and

trafficking in persons. [2] Defining irregular migration has been the subject of considerable debate. Terms such as illegal, undocumented, non-documented, and unauthorised migration can have different connotations in national policy debates. Due to this and the association with criminality the term “illegal migration” should be avoided, as most irregular migrants are not criminals. Being in a country without the required papers is, in most countries, not a criminal offence but an administrative infringement. [3] While the UN use the term “irregular” or “undocumented” migration, the European Commission favoured for a long time the term “illegal immigration”, but more recently refers to “irregular migration” as well. [4] The Council of Europe differentiates between illegal migration and irregular migrant. Referring to Resolution 1509 (2006) of the Council of Europe Parliamentary Assembly, “illegal” is preferred when referring to a status or process, whereas “irregular” is preferred when referring to a person.

Long-term migrant

A person who moves to a country other than that of their usual residence for a period of at least a year (12 months), so that the country of destination effectively becomes their new country of usual residence.

Migrant stock

The number of migrants in a given area on a certain date (e.g. 1 January or 31 December) of the year in question.

Migration

In the global context, movement of a person either across an international border (international migration), or within a state (internal migration) for more than one year irrespective of the causes, voluntary or involuntary, and the means, regular or irregular, used to migrate. In the EU context, the action by which a person either: (i) establishes their usual residence in the territory of a Member State for a period that is, or is expected to be, of at least 12 months, having previously been usually resident in another Member State or a third country; or (ii) having previously been usually resident in the territory of a Member State, ceases to have their usual residence in that Member State for a period that is, or is expected to be, of at least 12 months.

Notes [1] At the international level, no universally accepted definition for migration exists. [2] IOM defines migration as follows: “movement of a person or a group of persons, either across an international border (international migration), or within a state (internal migration), encompassing any kind of movement of people, whatever its length, composition and causes”. This broad definition covers all forms of migration (voluntary/forced migration, internal/international migration, long-term/short-term migration), different motives for migration (migration because of political persecution, conflicts, economic problems, environmental degradation or a combination of these reasons or migration in search of better economic conditions or conditions of survival or well-being, or other motives such as family reunification) and irrespective of the means used to migrate (legal/irregular migration). Thus it includes migration of refugees, displaced persons, economic migrants and persons moving for other purposes, including family reunification. [3] Under the UN, the definition “movements for shorter periods” would not be considered migration.

Migration flow

The number of migrants crossing a boundary, within a specific time period, for the purpose of establishing residence.

Notes [1] The boundary can range from within national borders, within the EU and international boundaries, and can range from international migration flows (crossing national borders) and internal migration flows (within the same national border). [2] UN statistics in particular also refer to “inflows” (flow of migrants entering into a particular boundary) and “outflows” (flow of migrants leaving a particular boundary).

Net migration

The difference between immigration into and emigration from a given area during the year.

Notes [1] Net migration is negative when the number of emigrants exceeds the number of immigrants. [2] Since many countries either do not have accurate figures on immigration and emigration or have no figures at all, net migration is frequently estimated as the difference between total population change and natural increase between two dates (in Eurostat’s database it is then called corrected net migration). The statistics on net migration are therefore affected by any statistical inaccuracies in any of the components used for their derivation.

Population stock

The inhabitants of a given area on a certain date (e.g. 31 December) of the year in question.

Note The population is based either on data from the most recent census, adjusted by the components of population change produced since the last census, or on population registers.

Remittances

Personal remittances. Includes personal transfers and compensation of employees. Personal transfers consist of all current transfers made or received by resident households to or from nonresident households. Compensation of employees refers to the income of border, seasonal, and other short-term workers who are employed in an economy where they are not resident and of residents employed by nonresident entities.

Short-term migrant

A person who moves to a country other than that of their usual residence for a period of at least three months but less than a year (12 months) except in cases where the movement to that country is for purposes of recreation, holiday, visits to friends or relatives, business, medical treatment or religious pilgrimage.

Stock of foreigners

The number of foreign nationals in a given area on a certain date (e.g. 1 January or 31 December) of the year in question.

Notes [1] The term is added because of the two methods used to calculate population stock. [2] Foreign stock can include migrants plus those born in a given area to foreign parents living in given area.

Temporary migration

Migration for a specific motivation and/or purpose with the intention that afterwards there will be a return to the country of origin or onward movement.

Consular registrations

All countries Voluntary registration of Portuguese and relatives in Portuguese consulates. Source 2015-2016 Ministério dos Negócios Estrangeiros, Direção-Geral dos Assuntos

Consulares e das Comunidades Portuguesas (DGACCP), Portugal: information provided on request. Data available in each country page at Observatório da Emigração. [LINK]

Foreign population

Belgium Foreign population accounted for in the population registered annually. Source 2015-2016: Eurostat, based in the Belgium Direction Générale Statistique et Information Économique. [LINK]

Canada Foreign population registered in the Census. The data refers only to foreigners who have only one nationality. Foreigners with two or more nationalities are excluded from this register, in line with international statistics using the same criterion. The statistical institute also provides this second information. In 2016 there were about 25,500 individuals born in Portugal with a second nationality in addition to the Portuguese. Source 2016: Statistics of Canada, National Household Survey 2016: citizenship (5), place of birth (272), immigrant status and period of immigration (11), age (12) and sex (3) for the population in private households of Canada, provinces, territories, census metropolitan areas and census, agglomerations. [LINK]

France The foreign population is counted in the annual census. The population census survey is collected by the municipalities and organized by the national statistical institute. Residents in France who are not French nationals are considered as foreigners. Foreigners with two or more nationalities are excluded from this register, in line with international statistics using the same criterion. The statistical institute also provides information that about 40% of the descendants of Portuguese immigrants (both parents) have dual nationality. For more information on the numbers see "Données complémentaires", here: http://www.insee.fr/fr/themes/document.asp?ref_id=ip1287. Source 2014: Institut National de la Statistique et des Études Économiques (INSEE): Répartition des étrangers par nationalité en 2014. [LINK]

Germany Foreign population registered in the Central Register of Foreigners (Ausländerzentralregister). The number concerns individuals of foreign citizenship living in the country for at least three months and includes both those born outside Germany and those born in Germany. The Emigration Observatory (OEm) is an independent technical and research structure within the Centre for Research and Studies in Sociology (CIES-IUL) of ISCTE – University Institute of Lisbon. The Observatory is based on a partnership between the CIES-IUL, the Institute of Sociology (IS-UP) of the University of Porto, and the Centre for Geographical Studies (CEG) and the Centre for Research in Economic and Organizational Sociology (SOCIUS/CSG), both of the University of Lisbon. The Observatory is supported by the Portuguese Ministry of Foreign Affairs under a cooperation agreement.
